

Fire Retardant

HAIRNETS

KORONETS

It can take an entire day to thread a hairnet machine. For some nets, the operator must thread 2800 holes before the knitting process can begin.

As the largest manufacturer of hairnets in the world and the only manufacturer in North America, we're proud of the products we create. Our hairnets and bouffants offer unbeatable product value, affordable quality, optimal fit and breathable comfort. They are the most widely worn products of their kind in the world.

Latex-free
